

Saferpay

# The secure payment solution for your web shop.

**WORLDLINE** 

Payments to grow your world

# Online payment system Saferpay

**With Saferpay, we offer merchants a comprehensive online payment system for simple and secure payment processing on the Internet.**

A single interface allows you to process all common national and international payment methods. The e-commerce solution can be integrated quickly and flexibly into the most web shop systems with just a few clicks. Offer your customers the right mix of means of payments and look forward to higher sales and fewer abandoned purchases on your checkout page.

## Your benefits

### For the online merchant

- Online authorisation of payments worldwide
- Acceptance of all major payment methods
- Simple integration with Integration Support
- Multiple currency and multi-client capable
- Dynamic currency conversion (DCC)
- Tokenisation solution
- No costs for unsuccessful transactions
- Free test environment

### For the card owner

- Maximum payment security
- Maximum data protection
- Quick and convenient payment processing
- Wide choice of means of payment

## #1

### Flexible

Via Saferpay, you can offer your customers a new payment method at any time, remove an existing one or change card processor.

## #2

### Easy

Integrate Saferpay into your e-shop application at minimal expense and in doing so "outsource" the whole payment gateway infrastructure, maintenance and operation.

## #3

### Secure

Saferpay supports all major safety standards and offers you, as an online merchant, the right methods so that payments in your shop can be processed as securely as possible.

# Saferpay extensions

## Responsive Design

Whether it be tablets, PC's or smartphones, the view of the Saferpay payment page adjusts to all required display sizes thanks to its responsive design.

## Saferpay Backoffice

The administration interface for managing Saferpay accounts and payment transactions.

## Saferpay Fields

Seamless and simple integration of form fields allows you to create custom payment forms or checkouts, reducing abandoned purchases and increasing conversion rates.

## Payment and Management API

The modern background payment processing interface for shop, ERP or merchandise management systems.

## Saferpay Batch Processing

The module for processing credit card and direct debit payments for file submission (batch processing).

## Saferpay Secure Card Data

The extension module for the secure, PCI-compliant use and storage of credit card data.

## Saferpay Risk Management

An additional package with extended services for the prevention of fraud.

## Dynamic Currency Conversion (DCC)

With DCC, the automatic currency conversion, your foreign customers can choose to either pay in their card's currency or in the respective local currency. And you benefit from additional revenue.

## Saferpay Plugins

Plugins available for all standard shop systems (e.g. PrestaShop, SAP Commerce Cloud or ePages).

## Saferpay OnSite

Process QR code payments via smartphone with the OnSite app.

# Maximum security

Offer your customers the maximum possible level of security. At the same time, we offer protection from payment defaults since it is also about your success and the sales your business makes.

## PCI DSS

Via Saferpay, you can process all credit card data securely in accordance with PCI DSS (Payment Card Industry Data Security Standard). PCI is the global security standard for international credit card organisations.

## Risk Management & Fraud Prevention

Use Saferpay Risk Management as an extension to Saferpay payment solutions and fraud prevention for AI-based risk assessment of transactions.

## 3-D Secure 2 and PSD2

Since 2019, Saferpay has supported the compulsory processing of transactions in accordance with the new 3-D Secure 2 security standard, which enables strong customer authentication when paying on the Internet. This enables you to comply with the new requirements of the second EU Payment Services Directive (PSD2).

## Card verification number CVV2/CVC2

The Card Verification Value from Visa (CVV2) and the Card Verification Code from Mastercard (CVC2) are encrypted verification numbers to protect against the misuse of credit cards on the Internet. The card verification number serves as a security feature for the online retailer to ensure the customer is in possession of the card.

# Multiple means of payment

With Saferpay, you can offer your customers all major payment methods in your web shop. Credit and debit cards, customer cards and online transfers.
